

Connected Agriculture

Where will technology and innovation take us?

GARETH DAVIES, CEO

November 2016

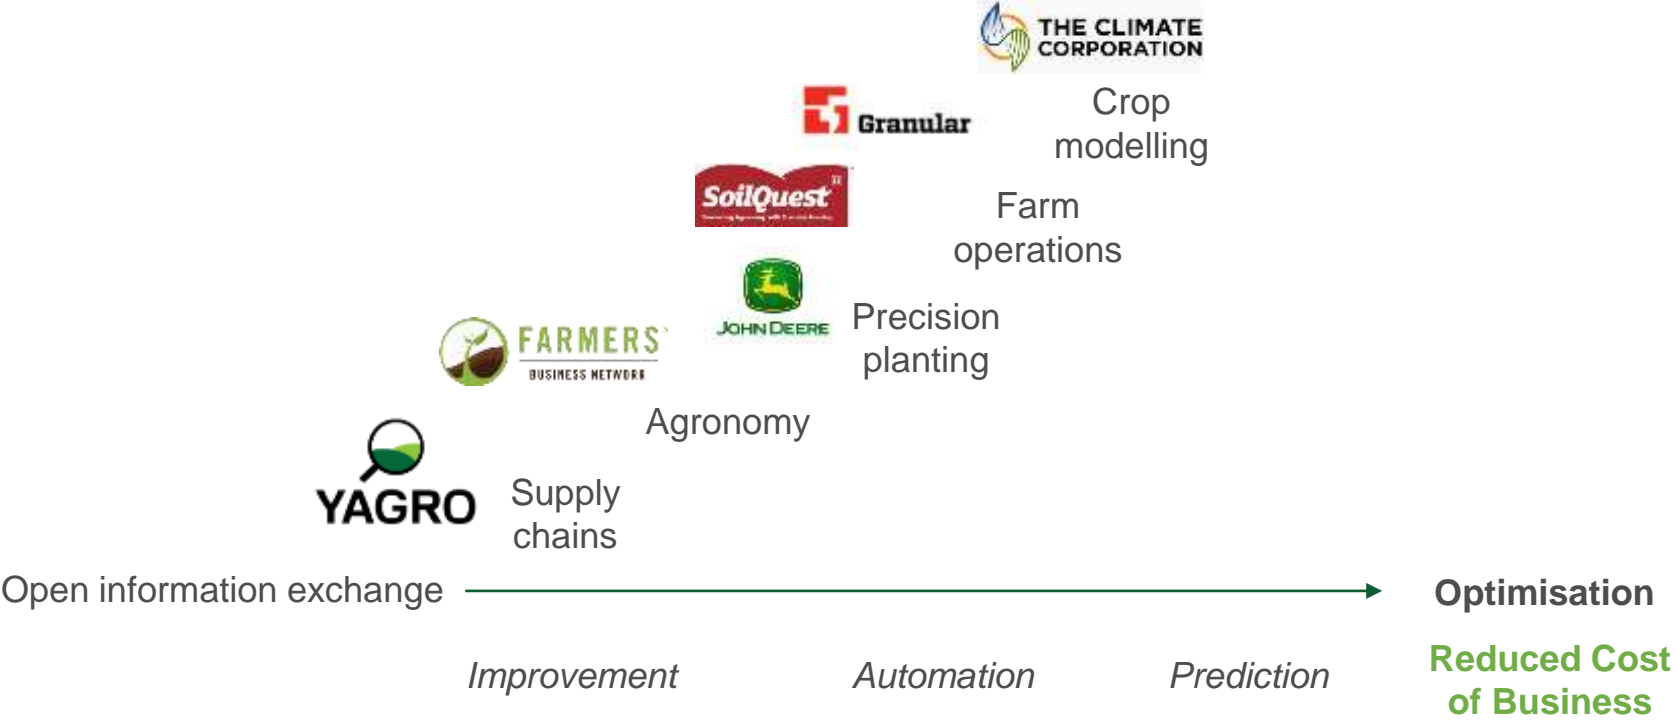

We live in a world of rapid change and transformation

UBER

Information technology set to transform every facet of farm activities

The result: the farm in your pocket

- Improving rural connectivity
- Changing expectations from farmers, especially with generational change
- Need to find every edge to stay competitive in a challenging global market

- All the information and choice in your hands
- Supportive technology to fully optimise all aspects

+ FREE TO YOU

YAGRO: the supply chain communication platform
